

CAREPLUS™ MOBILE RESIDENT CALL

CarePlus™ Mobile Resident Call is an innovative, RTLS solution providing aged care residents with the vital tool to page staff for assistance when help is required, empowering residents and generating greater care opportunities for staff. RTLS (Real-Time Location System) dual active technology RF (Radio Frequency) and IR (Infra-Red) is effectively utilised to pinpoint residents within a room, encouraging quick staff response to the exact room or outdoor area the resident is located. A simple mobile call button alerts for instant help or assistance, carried by the resident via a safe and robust lanyard. Call buttons are customisable according to the resident's, and/or facility's, needs with options including one button or two for only staff assistance, or staff assistance with emergency calling. Comprehensive communication offers residents freedom and independence within their aged care home, whilst optimising resources to create greater workflow and productivity for staff. Instantaneous alerts promote accelerated response times, ideal for aged care units and day surgeries. The RTLS CarePlus™ product line also hosts CarePlus™ Mobile Staff Duress and CarePlus™ Asset Tracking, complimenting CarePlus™ Mobile Resident Call with each product designed for specific issues of different components of a healthcare facility. These systems confront the growing demand for staff safety and equipment tracking respectively. CarePlus™ is committed to providing the essential support healthcare personnel require by delivering fundamental safety features and keeping all residents and caregivers satisfied with Mobile Resident Call.

UK – Europe office:

Unit 9, Miller Court, 43 Station Road
Kenilworth, Warwickshire,
CV81JD, United Kingdom
